

$$A = \sqrt{13} \quad | \quad \Delta \alpha = |3,60 - 3,60555| = 0,00555$$

$$B = \lg(23) \quad | \quad \Delta \beta = |1,361 - 1,36173| = 0,00073$$

$$\alpha = \sqrt{13} = 3,60 \quad | \quad \delta_\alpha = \frac{\Delta \alpha}{|\alpha|} = \frac{0,00555}{3,60} = 0,001641$$

$$\alpha_1 = 3,60555$$

$$\beta = \lg(23) \approx 1,361 \quad | \quad \delta_\beta = \frac{0,00073}{1,361} = 0,0005363$$

$$\beta_2 = 1,36173 \quad | \quad \beta - \text{точнее}$$

$$\alpha = \lg(63) \approx 1,79 \quad | \quad \Delta \alpha = |1,79934 - 1,79| = 0,00934$$

$$\beta = \cos(781) \approx 0,350 \quad | \quad \Delta \beta = |0,350797 - 0,350| = 0,000797$$

$$\alpha_1 = 1,79934 \quad | \quad \delta_\alpha = \frac{0,00934}{1,79} = 0,00521787$$

$$\beta_1 = 0,350797 \quad | \quad \delta_\beta = \frac{0,000797}{0,350797} = 0,00227714$$

$$\alpha = \sqrt{24} \approx 4,898 \quad | \quad \Delta \alpha = |4,898979 - 4,898| = 0,000979$$

$$\beta = \frac{5}{9} \approx 0,55 \quad | \quad \Delta \beta = |0,555555 - 0,55| = 0,005555$$

$$\alpha_1 = 4,898979 \quad | \quad \delta_\alpha = 0,000199$$

$$\beta_1 = 0,555555 \quad | \quad \delta_\beta = 0,0101$$
